

South Pole Carbon Asset Management Ltd. is a dynamic company working in the field of global climate change. We source, develop, manage and operate projects that reduce greenhouse gases with a strong focus on projects with Gold Standard quality. South Pole Carbon Asset Management Ltd. has offices in Zurich (head office), Bangkok, Beijing, Istanbul, Jakarta, Mexico, Taichung and Johannesburg. Due to successful growth, we are currently looking to recruit a highly motivated and dedicated:

Senior Project Manager Implementation, China, 100% (based in Beijing)

In this role you will be responsible for:

- Managing CDM project cycle from PDD to successful registration independently with necessary guidance.
- Interacting with project developers and maintain good client relationships.
- Working with project partners and third parties to prepare project validations and verifications including technical analysis.
- Building up capacity of assistant project managers in implementation.

You bring with you:

- A dynamic, hard-working mentality and a desire to be involved in a fast paced environment.
- Very good knowledge of the world's carbon market / Clean Development Mechanism.
- Sound knowledge of the concept of Additionality.
- Strong learning ability. Being able to learn new methodologies and develop PDDs independently.
- Strong technical skills and experience in, or familiarity with the energy, waste or industrial sectors.
- Masters degree (MSc or related degree) and 1 to 2 years of work experience in CDM project implementation.
- Good English, Chinese, plus working knowledge of all Microsoft office applications.

If you are interested in joining a young and international team looking to make a difference to the world we would be happy to hear from you!
